Feature request: Add triangle as a supported shape element
Closes #11143

PR Summary
This PR introduces triangle as a first-class shape across the Excalidraw editor stack.

It upgrades triangle from a simple drawable concept to a fully supported element with:

- creation via toolbar and shortcut
- rendering across canvas, interactive scene, and SVG export
- element conversion support
- bound text support with proper layout geometry
- arrow binding to triangle edges
- full interaction support (selection, resize, restore, etc.)

Files Changed

Core element & types

- packages/element/src/types.ts: Added ExcalidrawTriangleElement to core unions
- packages/excalidraw/types.ts: Extended public tool/type definitions
- packages/common/src/constants.ts: Added triangle tool constant

Shape behavior & geometry

- packages/element/src/comparisons.ts: Included triangle in shape capability checks
- packages/element/src/typeChecks.ts: Updated runtime guards for triangle
- packages/element/src/bounds.ts: Added triangle bounds + point generation
- packages/element/src/shape.ts: Added RoughJS triangle generation
- packages/utils/src/shape.ts: Extended shared polygon helpers
- packages/utils/src/withinBounds.ts: Added triangle silhouette checks
- packages/element/src/distance.ts: Added edge-distance calculations
- packages/element/src/collision.ts: Added triangle collision/intersection logic

Rendering

- packages/element/src/renderElement.ts: Enabled triangle rendering in scene
- packages/excalidraw/renderer/staticSvgScene.ts: Added SVG export support
- packages/excalidraw/renderer/interactiveScene.ts: Added interactive overlays

Text & binding

- packages/element/src/textElement.ts: Added bound-text support with inscribed text-box geometry
- packages/element/src/binding.ts: Added arrow binding (snap points, edges, side resolution)

UI & tools

- packages/excalidraw/components/icons.tsx: Added triangle icon
- packages/excalidraw/components/shapes.tsx: Added triangle to toolbar + shortcut
- packages/excalidraw/components/MobileToolBar.tsx: Added triangle to mobile UI
- packages/excalidraw/components/ConvertElementTypePopup.tsx: Enabled shape conversion
- packages/excalidraw/components/Actions.tsx: Updated shortcut labels
- packages/excalidraw/components/HelpDialog.tsx: Updated shortcut reference

Data & restore

- packages/excalidraw/data/restore.ts: Added triangle to restore/rehydration flows

Tests & helpers

- packages/excalidraw/tests/helpers/api.ts: Added triangle factory support

Locales

- Updated locale files to include triangle in UI labels and shortcut references

Notes

- This implementation aims to keep triangle behavior consistent with existing shapes like rectangle, diamond, and ellipse.
- Care has been taken to ensure compatibility across rendering, interaction, and export flows.
